Postcardstory. The MINI Countryman SE ALL4

With its ALL4 all-wheel drive, the all-electric MINI Countryman SE ALL4 is a reliable companion for adventures on any surface. The performance-enhanced crossover model offers plenty of space and comfort for the whole family thanks to a noticeably expanded interior.

P90543075

With a range of up to 433 kilometers according to the WLTP test cycle, the new MINI Countryman SE ALL4 promises long and locally emission-free driving pleasure on any terrain. Thanks to extended driving assistance systems and partially automated Level 2 driving, this all-rounder offers even greater safety and comfort. The maximum off-road character of the MINI Countryman is emphasized by the vertical body design with short overhangs and slim contouring. The different vehicle characteristics can be emphasized by four individual trim variants; the characteristic MINI contrasting roofs are available for the first time in the new Vibrant Silver shade.

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
